

***AverLogic spotlights marketable, viable video solutions for huge Las Vegas show!***

## AverLogic CES 2011 – Brilliant solutions for Car Video Surveillance, HD Video over Power Lines and HD Video Frame Buffers

(Taipei, Taiwan, November, 2010) AverLogic Technologies, an IC solutions provider for the Video industry, is coming to CES 2011 to show off versatile Video solutions.

This year's booth will feature:

- Vehicle Surveillance Display systems
- HD Video streaming over power lines (PLC - Power Line Communications)
- HD Video Frame Buffer for HD Video Equipment

### **Vehicle Surveillance Video Systems with DVR**

AverLogic will bring a great selection of Vehicle Surveillance Video solutions, including 4, 8, 9 channel Video Multiplexers; small to medium sized LCD and TFT Panels; and DVR (Digital Video Recording) products. AverLogic DVR Car Surveillance solutions are receiving increasing attention in the market, as consumers look for practical solutions to protect their vehicles with anti-theft security, parking assistance and accident insurance evidence.

### **Best Home Power Line HD Video Streaming – Mature, reliable, practical PLC technology.**

AverLogic and partners have developed the most advanced, state-of-art Home Power Line HD video streaming solution in the market. This technology has steadily evolved to take advantage of all the benefits of PLC to become a mature, viable solution that is both powerful and reliable. See to believe – a live demo will be on hand at the show.

### **HD Video Frame Buffer – Huge design, development advantages for Studio Cameras, Video Switchers, Capture Cards and more!**

AverLogic's powerful AL460 IC is an HD video frame buffer that has important ramifications for the future of the HD Video market. With more HD video products being planned for the market, the AL460 offers significant cost and time reductions in design and development. A very straightforward developer interface sidesteps many design challenges; efficient FIFO methodology boosts performance over DDR solutions; and evaluation/development equipment help to hasten time-to-market.

**Come, see and ask at the AverLogic CES 2011 booth**

In addition to the products above, AverLogic will have other solutions using AverLogic video technology including:

- HMD Video glasses
- Video Door Phone
- Graphic OSD solution
- Audio/Ethernet PLC product
- MPEG-4 IP Camera
- MPEG-4 Network Video Server

Come visit us and ask away – AverLogic staff looks forward to meeting your acquaintance.
