

Status January 2022

Directive 2002/95/EC Directive 2011/65/EC Amendment 2015/863/EU, extension of Annex II of directive 2011/65/EU

Directive 2011/65/EC, replacing Directive 2002/95/EC, on the restriction of the use of certain hazardous substances, is aimed at electrical and electronic equipment in order to avoid harmful effects on human health and the environment.

The RoHS Directive 2011/65/EU was extended by Directive 2015/863/EU published in June 2015. The regulations concerning the limit values for the newly added substances in electrical and electronic equipment will come into force on 22 July 2019.

Glyn GmbH & Co KG is an authorised distributor of electronic parts and components. As a distributor, we are unfortunately unable to make material declarations, as we do not have specific knowledge of the production process or the ingredients in the products we sell. With regard to the ingredients, we are 100% dependent on the information and declarations provided by the respective manufacturer.

Glyn is a member of the FBDi (Fachverband der Bauelemente Distribution e.V.) and is actively involved in the relevant environmental and compliance committees, which work with legislators and manufacturers to develop practical solutions.

Glyn also works continuously and intensively to ensure that our customers have access to our franchise-manufacturers' RoHS declarations on the products we supply. The results and statements obtained from this are available on our homepage, sorted by manufacturer.

If the RoHS conformity is known to us, this is declared on the delivery and invoice documents in accordance with the legal requirements.

As we are only intermediaries, we can only pass on the information of the respective manufacturer who provides us with this information. Please understand that we are not in a position to fill in lists sent to us, but can only process enquiries about specific items.

Please contact your local distributor if you have any further questions regarding the RoHS compliance of products.
