

We attach particular importance to the direct transfer of know-how.
That is why we came up with the idea of offering special **digital SUPPORT**.

"GLYN-Talks" – compact knowledge and interesting topics

The benefits for you:

- ▶ **You determine the "GLYN-Talks" topics**
From the available module programme as required, approx. 20 minutes per talk.
- ▶ **You choose the time and the participants**
To fit in with your schedule.
Colleagues from your company can be quickly integrated.
- ▶ **Almost like being there in person**
Live specialists from GLYN / manufacturer: all your questions are dealt with individually and immediately.
- ▶ **An MS Teams solution**
A well-known platform. Fast, customised, combinable, simple, free.

Choose your modules.

Our GLYN-Academy team will coordinate everything else with you and the specialists.

Analog ICs

Topic	Voltage regulator line-up
Manufacturer	ABLIC
Module	AIC-001
Contents	<p>ABLIC regulates your voltage You need compact and efficient voltage regulators? ABLIC offers you a wide range of linear LDOs a) in ultra small package HSNT-4 (0808, AOI compatible) b) with extremely low quiescent current of typ. 2nA (S-1318xxx) c) products qualified for automotive use.</p> <p>In combination with ABLIC's low-current and ultra-small voltage detectors and analog battery protection ICs, you can develop very compact battery applications with high safety standards. And this with battery runtimes that have hardly been achieved so far. How? Find out in our GLYN-Talk.</p>
Coordinator	Claudia Jackson

Topic	DC/DC Power Management
Manufacturer	SG MICRO
Module	AIC-002
Contents	<p>Efficient power management solution from SG MICRO Would you like to implement an efficient and robust power management solution with little effort? In this GLYN-Talk, we will show you how you can easily implement this. Using a retrofit design on μA/LM78XX-TO-220 form factor, you will learn what you need to consider in the design. The focus is on the SGM61410 synchronous switching regulator from SG MICRO.</p>
Coordinator	Harald Kasteleiner

Displays

Topic	GLYN, your HMI partner
Manufacturer	-
Module	DIS-001
Contents	<p>How to transform a display into a modern and robust HMI. "Smartphone Look & Feel". Familiar things from our daily lives are increasingly finding their way into industrial applications. How do you transform a display into a modern and robust HMI? GLYN is your partner for glass, printing, optical bonding, touch and mechanics. This GLYN-Talk will help you set the course for successful implementation</p>
Coordinator	Manuel Krause

Topic	Achieve your development goal faster with SMART Embedded Display
Manufacturer	-
Module	DIS-002
Contents	Your path to the "smart" display solution Smart Embedded: What is that and what advantages does a smart display offer? Here the intelligence is already built into the display! Smart Embedded products are displays with a Cortex®-M7 (ST32 series) and various interfaces. In addition, you get a software with which you can conjure up a modern GUI on the display within a few hours. Learn more about the fast way to the goal with this GLYN-Talk.
Coordinator	Manuel Krause

Topic	Displays & System Solutions Update
Manufacturer	-
Module	DIS-005
Contents	New technologies and possibilities for your applications HMI systems, displays and touch panels, embedded solutions and industrial PCs: In this GLYN-Talk, we will inform you about new technologies and possibilities that will help you develop your application faster and better.
Coordinator	Gerald Diehl

Topic	HOLITECH ePaper Displays
Manufacturer	HOLITECH
Module	DIS-007
Contents	A display like a piece of paper: Get to know the advantages of ePaper Displays and where they can be used.
Coordinator	Christian Arnold

Embedded Computing

Topic	CoM modules in industry
Manufacturer	KA-RO
Module	EBC-001
Contents	One click to the new power class Simply exchange the power class with one click. CoM modules can be scaled excellently. You select the right modules from a wide range of peripheral options. This ensures that your application remains future-compatible. Count on long-term availability of 7 years and more. Learn more about areas of application and starter kits for a quick start in GLYN-Talk.
Coordinator	Christoph Tenbergen

Topic	ARM® in industrial applications
Manufacturer	ADVANTECH, AAEON, MITAC
Module	EBC-003
Contents	From CoM to Boxed PC: ARM® in different form factors With increasing performance at low power consumption ARM® processors become more and more interesting for all kind of industrial applications, where X86 has been used before. In this GLYN-Talk you will get an overview of our portfolio of CoM Modules, SBCs, Boxed PCs an Tablets based on ARM®
Coordinator	Tobias Heep

Interface

Topic	Video bridge ICs for high-speed protocols
Manufacturer	TOSHIBA
Module	INT-001
Contents	Fast transfer of large amounts of data Increasing resolutions and image qualities for multimedia content. Huge amounts of data are transferred between cameras, displays and peripherals. With TOSHIBA Videobridge ICs you connect MIPI®, LVDS, DisplayPort and HDMI to the interfaces of your application. In our GLYN-Talk we show you which bridge is suitable for your product - from a technical and commercial point of view.
Coordinator	Alexander Haink

Memory Solutions

Topic	Xmore® – Tailor-made industrial storage media
Manufacturer	Xmore®
Module	MEM-001
Contents	Memory solutions for individual customer requirements Industrial storage media made to measure! Learn more about our Xmore® brand. Find out how easily and individually product-specific customizations are possible. Find out more in our GLYN-Talk.
Coordinator	Sebastian Stricker

Topic	Industrial Managed Memory Solutions at its best!
Manufacturer	GLYN
Module	MEM-013
Contents	Everything from a single source! As specialists in industrial memory solutions, we are your professional experts in the design-in process. Our portfolio of strong brands offers robust and secure memory solutions for industry. Whether you need legacy products, customized solutions or cutting-edge technologies, we have the right solution for you! Explore our extensive portfolio of industrial memory solutions and experience the benefits of working with a design-in specialist distributor. Book your GLYN Talk now!
Coordinator	Benjamin Fasel

Optoelectronics

Topic	TOSHIBA optocoupler line-up
Manufacturer	TOSHIBA
Module	OPT-001
Contents	Quick and compact the highlights of the manufacturer According to its own information, TOSHIBA is the global market leader in the manufacture of optical semiconductors. The manufacturer can draw on more than 40 years of experience in the field of optocouplers. In our GLYN-Talk, we present the current lineup of optocouplers and photorelays. Learn everything about a quick evaluation via starter kits and PROMO cards.
Coordinator	Alexander Haink

Power Electronics

Topic	Low-voltage MOSFETs - Really "cool" types with more performance
Manufacturer	TOSHIBA
Module	POW-001
Contents	New housings improve cooling and increase reliability More power, less heat. These "guys" just stay "cool." TOSHIBA's U-MOS IX-H and X-H MOSFETs are highly efficient devices for DC-DC converters, power supplies, chargers, BLDC motor controllers. Here you can achieve excellent efficiencies. New packages improve cooling and increase reliability. The components are specified for applications up to 175 °C. Find out in our GLYN-Talk which "cool" types you should go for.
Coordinator	Stefan Besier

Topic	Analog & Power Update 2025
Manufacturer	MPS, MITSUBISHI, SANKEN, SG MICRO, TDK, TOSHIBA
Module	POW-003
Contents	Brief overview of our manufacturers, their products and technologies in the field of analog technology and power electronics. This GLYN-Talk informs you about the product highlights of our manufacturers for your existing and future applications.
Coordinator	Stefan Besier

RTCs (real-time clocks)

Topic	Energy-efficient RTCs (real-time clocks)
Manufacturer	ABLIC
Module	QRZ-001
Contents	Highest precision in the currently smallest housing in the world Your application requires a very precise time reference? And as energy-efficient as possible? Learn all about ABLIC's very special timer products in our GLYN-Talk. From Real-Time Clocks to Convenience Timers to Counter ICs. ABLIC offers the smallest packages in the world today, measuring 0.8 x 0.8 x 0.4 mm. The manufacturer is also a leader in standard packages such as SOT 23-5 and SOT89. Ideal for products in medical, industrial and automotive applications.
Coordinator	Claudia Jackson

Sensors

Topic	Hall effect ICs for motor control
Manufacturer	ABLIC
Module	SEN-002
Contents	<p>Reliable magnetic sensors for demanding environments</p> <p>Would you like to operate your motor even more compactly and efficiently? Or optimize it for use in particularly challenging environmental conditions? With the Zero Crossing Latch (ZCL™) Hall-effect ICs from ABLIC, you will find an extensive product range of magnetic sensors. We will be happy to present these to you in more detail in our GLYN-Talk.</p>
Coordinator	Claudia Jackson

Wireless

Topic	5G – High speed connectivity
Manufacturer	SIERRA WIRELESS
Module	WIR-005
Contents	<p>Worldwide high speed quickly integrated in M.2 form factor</p> <p>The latest mobile technology 5G enables new applications with fast data transmission. In the GLYN-Talk, we present the technology with the most important features as well as concrete product solutions.</p>
Coordinator	Salvatore Capobianco

Topic	Cellular modules for industrial M2M and IoT applications
Manufacturer	SIERRA WIRELESS
Module	WIR-006
Contents	<p>Into the IoT with a scalable wireless solution - thanks to SIERRA WIRELESS</p> <p>How can wireless be integrated quickly and reliably into your applications? What product solutions are available? And why should you pay attention to scalability? We will answer these and other questions in the GLYN-Talk based on the solutions in the compact and scalable Common Flexible Form Factor CF3.</p>
Coordinator	Salvatore Capobianco

Topic	LTE-M und NB-IoT – Power-efficient into the Internet-of-Things
Manufacturer	SIERRA WIRELESS
Module	WIR-007
Contents	Connecting your battery-powered application to the IoT Low Power Wide Area (LPWA) radio technologies LTE-M and NB-IoT enable low-power, battery-operated applications for the Internet-of-Things. In this GLYN-Talk, learn what makes these technologies tick and what concrete solutions are available.
Coordinator	Salvatore Capobianco

Topic	Mioty
Manufacturer	MIROMICO, SILICON LABS, WEPTECH
Module	WIR-022
Contents	Modern wireless technology for the Internet of Things (IoT) Energy-efficient, robust, and scalable: In this GLYN Talk, we show you how mioty uses an innovative “telegram splitting” process to transmit data from thousands of sensors simultaneously and reliably over long distances. Ideal for applications in smart cities, Industry 4.0, and energy supply - even in challenging environments.
Coordinator	Marco Jung

Other

Topic	International Sourcing
Manufacturer	-
Module	OTH-001
Contents	Worldwide procurement of products from leading manufacturers GLYN offers you two solid business areas or contract models for the procurement of components - franchise and sourcing. Especially in sourcing, we have a stable supplier structure that has grown over 30 years and is secure. Here we procure products from leading manufacturers worldwide. And with the high standards of a franchise dealer in terms of quality, service and reliability. Learn all about our sourcing service in our GLYN-Talk.
Coordinator	Paulo Sousa

Topic	GLYN Logistics: Secure supply chain for development and production
Manufacturer	-
Module	OTH-002
Contents	You want to: <ul style="list-style-type: none">▶ Always have your products available when they are needed?▶ Save valuable time?▶ Keep your financial resources flexible at the same time? Then you already have very good reasons to book a GLYN-Talk Logistics!
Coordinator	Fabian Hoffend

Please note that in some countries, specific or restrictive agreements have been reached with various manufacturers.
